Executive Summary

## CareerWise CO alumni achieve high job and college placement rates and earn more than their peers

### CareerWise CO launched a survey to learn about post-completion outcomes and improve its program

- The survey targeted 135 alumni from 2020 to 2022 cohorts
- 51% of participants, answered the survey, a response rate above typical values and rule of thumb thresholds for statistical accuracy

#### Most students experienced a positive outcome in the year following program completion

- 98% of respondents get a job or enroll in postsecondary education after completion
- 83% of respondents obtained a job, 50% continued onto post-secondary education, and 35% did both

#### Alumni that attained a job, obtained higher wages than their state peers

- The average hourly gross wage is \$24.60. This is almost \$6 higher (or 29%) than the state average for householders under 25 years old
- The hourly wage from most alumni is enough to sustain one adult (\$18) but not enough to sustain a household of 2 adults and a child (\$31)

## CareerWise Colorado launched a survey to three cohorts to learn about post-completion outcomes

- Purpose: CareerWise Colorado launched an alumni survey to learn about postcompletion outcomes
- Surveyed cohorts: 2020 to 2022
- **Response rates**: The overall response rate was 51%
- Main indicators: the survey asked about job placement, college enrollment, and hourly wages, among others
- Timing: The survey was distributed in October and November 2022
- Limitations:
  - Self-selection bias: often respondents differ from non-respondents significantly, which may affect the representativity of results
  - Recall bias: since the survey rely on self-reported reporting of past events,
     there may be inaccurate or incomplete answers, especially for early cohorts

Analysis 7

## 51% of participants, answered the survey, which is higher than the average response rate for surveys

#### Response rate by cohort

| Cohort | # of alumni<br>that<br>filled the<br>survey | Response<br>Rate |  |
|--------|---|------------------|--|
| 2020   | 18  | 40% -            |  |
| 2021   | 34  | 85% •            |  |
| 2022   | 17  | 34% 🔸            |  |
| Total  | 69  | 51% •            |  |

Response rate by gender and cohort (68 responses)

Typical survey response rates can lie anywhere between the 5% to 30% range\*

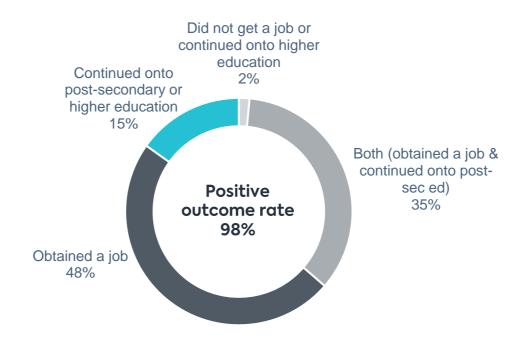

Most respondents are male and white/Caucasian

Note: Selection bias could significantly affect the presented results (even if the response rate was much higher than the current one). That said, response rates are a) high enough for statistical purposes, b) in line with other grantees, and c) above thumb of rules

## 98% of respondents obtained a job and/or continued onto higher education after program completion

% of respondents by outcome in the year following program completion Total: 66 responses

- 98% of respondents found a job and/or continued onto post secondary or higher education in the year following the program completion.
- 83% of respondents obtained a job, 50% continued onto post-secondary education, and 35% did both

### Post-completion outcomes are partly explained by the training pathway\*

• Pathways were grouped. E.g. business includes all pathways with a business component, like Business and accounting. Business also includes 4 students from the financial services pathway

Pathways with less than 5 responses are not shown

### Alumni earn \$24.60 per hour on average, above comparable benchmarks

Benchmark of average hourly gross wages with different thresholds\*

Alumni's average hourly wage is \$5.60 greater (or 29%) than the median hourly wage of state householders under 25 years

Number of students by wage Total: 53 responses

Most alumni earn between \$15 and \$20 per hour, equivalent to \$31 to \$42 thousand per year

<sup>\*</sup> Sources: State and federal minimum wage Paycor, Living and poverty wages from MIT living wage calculator, median state wage from data.census

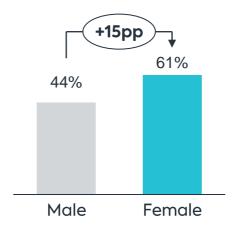

<sup>\*\*</sup> For confidentiality purposes, respondents did not enter an exact wage. They reported wages with a one-dollar margin (e.g. \$17 to \$18), and we took the midpoint as proxy value

## Male alumni have a greater job placement rate and hourly wages, while female alumni have a greater college enrollment rate

% of alumni that obtained a job after program completion Total: 62 responses

A greater percentage of male respondents get a job after program completion (+13 percentage points) % of alumni that enrolled onto PS education after program completion\* Total: 62 responses

A greater percentage of female respondents continued onto higher education after program completion (+15 percentage points)

Estimated hourly gross wage before taxes

Total: 53 responses

The hourly wage for male alumni is 36% higher than for female

These differences are partly explained by the selected pathway - See next slide

# Male alumni earn a higher wage within the same pathway and also tend to choose pathways with greater average wages

### # of alumni by training pathway and average wage Total: 62 responses

| Training pathway   | Female | Male | Female | Male   |
|--------------------|--------|------|--------|--------|
| IT                 | 4      | 19   | \$21.3 | \$30.9 |
| Business           | 12     | 7    | \$20.9 | \$20.8 |
| Manufacturing      | 1      | 9    | NA     | \$25.8 |
| Financial Services | 3      | 1    | \$18.5 | \$22.5 |
| Hospitality        | 1      | 2    | \$15.5 | \$15.5 |
| Health             | 1      | 1    | \$15.5 | \$26.5 |
| Education          | 1      |      | \$21.5 |        |
| Grand Total        | 23     | 39   | \$20.0 | \$27.1 |

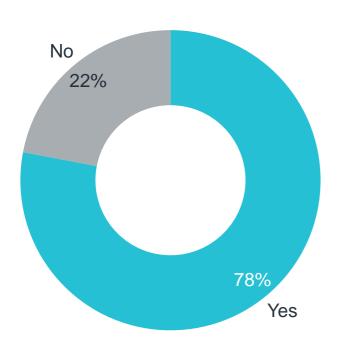

19 male alumni completed an IT related pathway, compared to 4 female alumni

IT pathway, in turn, has higher average wages than the other pathways

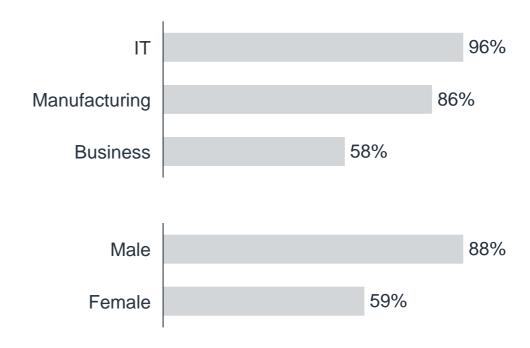

# 78% of respondents stated that their job is related to their training pathway

# of alumni for whom their job is related to their training pathway

Total: 54 responses

# of alumni for whom their job is related to their training pathway – breakdown across pathway and gender Total: 45 responses

Pathways with less than 5 responses are not shown

<sup>•</sup> Pathways were grouped. E.g. business includes all pathways with a business component, like Business and accounting. Business also includes 4 students from the financial services pathway
